If your database needs more than four. I create a post with a new comment. Like this. Yet, I see nothing changed in the post page, but on the other hand I can see the new comment in my dashboard. How to resolve this issue? HELP, cannot install : Thanks a lot, and Does anyone knows what the minimal requirements are to install the Navicat database studio? I am now using Navicat 11.0.5 because I cannot install Navicat 8.1 anymore I get the following error: I suspect that Navicat 11 does not run correctly on MacOSX 10.13 or later. Please report your results on the Navicat User Forum However, I was able to run Navicat 12.1.1 on my computer. I have not yet installed Navicat 12.1.1. I have used the 3 month free trial Navicat 12.1.0. What is the minimal requirements to use Navicat? I do not have Navicat 12.1.0 installed on my computer. So what are the minimum requirements? Also, could anyone please tell me how to create a procedure or trigger using Navicat? I have made some search but all I found is how to create a view using Navicat, how to create tables and modify database views using Navicat, but not how to create a procedure or trigger. I have tried to create a function that changes the value of the price for a certain product from 1.00 to 2.00, but it gives me an error: I am using Navicat 12.1.0 with MySQL version 8.0.14. The "Run" menu is not opening. Instead I get the message "Starting Navicat Premium 12.1.0.4432..." "Error reading from source ': Navicat Premium 12.1.0.4432..." I got this message when I ran Navicat after deleting all previous versions from the applications folder. MySQL version : 8.0.14 PostgreSQL version : 9.3.15 Thanks in advance for your help. Does anybody know what is the minimum requirements to install Navicat? Hi, What is 82157476af
